Leveraging the Power of the AI-Matrix

Boost your
sales by
25%

Accelerate Revenue Growth with
Digit7's autonomous smart store
and frictionless check-out
solutions.

Industry leaders are rapidly acknowledging that generative AI is transitioning from being an exception to becoming the new standard. At Digit7, we embrace the power of AI by delivering a seamlessly integrated smart checkout solution, an autonomous smart store solution and a data annotation tool.

Our mission is clear: to empower enterprises in boosting their revenue, fortifying customer loyalty, and nurturing business growth.

DIGITMART

An AI-powered autonomous smart store within a store solution.

An AI-Powered Autonomous Smart Store

- Empowers modernization with an autonomous smart store with autonomous checkout capabilities.
- Results in a sales per square foot increase of 20% - 60%.
- Remarkably reduces operational costs by up to 30%.
- Deployed as a retro fit or as a new build.

DIGITKART

A frictionless check-out solution that can identify multiple items in less than a second.

Frictionless Check-out Solution

- Industry leader in the amount of items it can identify in seconds.
- Enables customers or guests to set, pay and go. No barcode scanning required.
- Designed for an ultra-seamless shopping experience.
- Completes Transactions in 10 seconds - six times faster than standard self check-out solutions.

DIGITSQUARE

A SaaS-based platform for annotating, training, and automating the computer vision pipeline.

Content and language annotation tool

- An All-in-One SaaS Platform.
- Annotate, train & automate Computer Vision.
- Simplifies Computer Vision Technology Adoption.
- Dive into our 14-day trial and experience the difference firsthand.
